

NATURAL HEALTH SUMMER SOLSTICE CONFERENCE 2002
June 20-30, 2002 / Santa Fe, NM

Overview

The University of Natural Medicine is excited to announce the schedule of events for the **Natural Health Summer Solstice Conference 2002**. The Conference events range from practical trainings to lectures, seminars or classes. Most of these are open to anyone from the University student and faculty body, practitioners, and the general public, with some exceptions specified in the details of each event below. Events will be held at the University's campus and at a venue in Santa Fe.

The events are being offered individually so you may attend and pay for only those you choose. There is some overlap so, unfortunately, you cannot attend everything being offered. Pricing sometimes features a University of Natural Medicine discount student and faculty rate, and then an "others" rate.

Traveling and Accommodations

Information on traveling to, and accommodations in, Santa Fe will be provided upon request. We have established some good "deals" on accommodations here in Santa Fe for attendees of the Conference. Give us a call and we can tell you about them. We also encourage you to visit the Santa Fe Chamber of Commerce website for comprehensive information on visiting Santa Fe: www.santafechamber.com.

Registering

A Registration Form is provided at the end of the Description of Events. You may also request that a copy of it be e-mailed, faxed, or mailed directly to you.

Schedule of Events

The following schedule lists the events of the **Natural Health Summer Solstice Conference 2002**, according to program offerings on each date from June 20-27. Changes that have been made in programming since the last newsletter are noted in detail following the Schedule. To access the full schedule with all details, please visit the University's website: www.universitynaturalmedicine.org

DAILY CONFERENCE SCHEDULE

Thursday, June 20

International Association of Colon Hydrotherapy 100 Hour Certified Training – full day

Friday, June 21

International Association of Colon Hydrotherapy 100 Hour Certified Training – full day
Live Blood Analysis Using Darkfield Microscopy According to Günther Enderlein – full day
Tree of Dreams: A Hero's Journey – evening

Saturday, June 22

International Association of Colon Hydrotherapy 100 Hour Certified Training – full day
Live Blood Analysis Using Darkfield Microscopy According to Günther Enderlein – full day
Urine and Saliva Analysis According to Reams – full day

Sunday, June 23

International Association of Colon Hydrotherapy 100 Hour Certified Training – full day
Live Blood Analysis Using Darkfield Microscopy According to Günther Enderlein – full day
Biological Terrain Assessment – full day
Amazonian Shamanic and Botanical Medicine – full day

Monday, June 24

International Association of Colon Hydrotherapy 100 Hour Certified Training – full day
Computer Regulation Thermography (CRT) – evening

Tuesday, June 25

The Science of Colostrum – evening

Wednesday, June 26

The Peril of Vaccinations - evening

Thursday, June 27

Nutritional Therapies for Cancer Prevention & Treatment– evening

DESCRIPTIONS OF EVENTS

June 20, 21, 22, 23, (24)

International Association of Colon Hydrotherapy (I-ACT) 100 Hour Certified Training

Coursework includes: Fundamentals of anatomy and physiology; Indications and contraindications for colon therapy; Nutritional support, herbs and supplements; Flora imbalances, parasites, digestive pathologies; Professionalism, business practices and legalities; Massage, reflexology, meridian points and aromatherapy; Ethical standards, hygiene and safety; Administering colon hydrotherapy sessions on Dotolo and Specialty Health closed systems.

Presenters: Jae Bird BS, CT, LMT & Celia Green MA, CT, LMT

Both presenters are I-ACT Certified Colon Therapy Instructors.

Jae Bird is the co-founder of Circle of Life Education and Healing Center. She is a graduate of S.U.N.Y. College of Environmental Science and Forestry; Dr. Scherer's Academy of Natural Healing, Southwest School of Herbal Medicine, and the New Mexico Herbal Institute. Bird is also the founder, consultant and field herbalist for Jae Bird Botanicals, a bio-regional herbal extract and salve company. She is an Herbal Instructor at the National College of Phytotherapy, University of New Mexico and the Santa Fe Community College.

Celia Green is the co-founder of Circle of Life Education and Healing Center. She is a graduate of Southwestern College with a Bachelor's in Applied Psychology and a Master's in Counseling. She is also a graduate of Dr. Scherer's Academy of Natural Healing and has been a massage therapist since 1986. Green is a partner and manager of Jae Bird Botanicals, and an ethical harvester of wild herbs. She teaches aromatherapy at the University of New Mexico.

Cost: \$1600

Location: Circle of Life Education and Healing Center

Time: full days

Credits: 8

CEUs: 100

Special certification: I-ACT Certification

Prerequisites: The independent-study portion of this course must be completed before taking this practical training. Please register as soon as possible.

June 21, 22, 23

Live Blood Analysis Using Darkfield Microscopy According to Günther Enderlein

This course will assist you in learning how to distinguish factors seen in the blood through darkfield analysis that provide vital information as to the patient's overall health. You will learn how to observe and evaluate pleomorphic developments in the blood, including methods of determining immune strength, stages of degenerative processes and the state of the internal terrain. This study will provide an understanding of the role which bacterial and fungal developments play in metabolic and congestive complications leading to degenerative disease

Presenter: Maria Gabrielle, ND, LMT

Dr. Maria Gabrielle is the founder of Alternative Therapy Associates, a holistic medical center in Santa Fe, NM, where she treats patients from all around the world. Her specialty within the Naturopathic practice is Biological Medicine, which includes Darkfield Microscopy according to Enderlein, Biological Terrain Assessment, Herbology, Nutrition, Bio-energetic Evaluation, Sanum Therapy, Orthomolecular Medicine, and Homeopathy. She has studied internationally to develop her eclectic expertise in the field.

Cost: student \$450, doctor \$695

Location: Kinship Institute, 1264-B Rodeo Road, Santa Fe

Time: 9:30-5:30 daily

Credits: 2

CEUs: 21

Prerequisites: Completion of the University's course Introduction to Darkfield Blood Analysis (NM 602) beneficial, but not required.

June 21

Tree of Dreams: A Hero's Journey

Everyone is a Hero. Everyone has a Story. Lynn Andrews is acknowledged as one of the creators of the genre called 'Visionary Autobiography.' For over two decades this amazing woman has shared her knowledge through ceremony, sacred experiences and her special ability to weave the truth into a story that you can literally step into and make your own. In her newest book *Tree of Dreams*, Lynn reminds each of us that we all have personal healing stories. Through sharing our stories we are empowered to see and experience our humanness and our divinity woven together in a wonderful, sometimes humorous, and always healing adventure. It is time to start truly remembering your story – remembering your truth, your beauty and your story, understanding why you are here and knowing what you came into this life to experience and share with those around you. This is a bit like piecing together a puzzle. You will find the pieces that are right for you and then we will string these pieces together to create a beautiful story. Please join us for this magnificent workshop.

Presenter: Lynn Andrews

Internationally acclaimed, best-selling author, Lynn Andrews has written over 18 books, currently published in 12 languages. Her work continually leads us into a powerful exploration of self-discovery and spirituality. Considered a pre-eminent teacher in the field of personal development, Ms. Andrews is a 21st century shaman and contemporary mystic whose words reflect her path, a path of heart. For more than a decade, women and men from all over the world have gathered with Ms. Andrews for an annual four-day retreat in California. In response to requests for further in-depth study, The Lynn Andrews Center for Sacred Arts and Training was established in 1994. Andrews' work explores the ancient teachings taught by the Sisterhood of the Shields that embrace the study of global shamanic cosmologies. It is her intention that through this work we understand how all that is sacred in life weaves together within our world. Throughout time, shamans have practiced the art of choreographing energy in a nonlinear field. Shamanic knowledge and practice is at the very heart of creation. As 21st Century shamans we learn to create a sacred circle in which we transform our ordinary life into a life of power.

Cost: \$25

Location: TBA

Time: evening

CEUs: 2

June 22

Urine & Saliva Analysis According to Reams

The goal of this intensive practicum is to provide you with an understanding of how to evaluate the body chemistry via the use of urine and saliva and use this understanding to increase a person's level of health. Specifically, you will learn how to properly conduct tests on urine and saliva as originally outlined by Carey Reams and interpret the information contained in the test results. You will also learn how to use the test results to tailor dietary and lifestyle recommendations to change the body chemistry and increase overall health. Urine and Saliva Analysis can be used alone or in conjunction with other testing techniques to help restore balance and proper functioning to the body. It is easy to perform and requires only practice and experience to master.

Presenter: Chad Oler, ND

Dr. Chad Oler has an extensive background in natural health and healing, with over 15 years experience researching and consulting on nutrition and exercise. He has studied, lectured and taught throughout the United States, Canada, Great Britain, Germany, Peru, and Southern Africa. He holds degrees or certificates in Chemical Engineering, Technical Communications, Business, Shamanic Medicine, Personal Training, Reiki and Sports Nutrition in addition to his doctorate in Naturopathy. Dr. Oler is an avid athlete who enjoys triathlon and hockey. He is co-founder of the Natural Path Center, a holistic clinic in Madison, WI.

Cost: \$75 students and faculty / \$100 others

Location: TBA

Time: 9-12, 2-5 PM

Credits: .5

CEUs: 6

Prerequisites: Completion of the University's course Urine & Saliva Analysis (NM 405) beneficial, but not required.

June 23

Amazonian Shamanic and Botanical Medicine

Dr. Gonzalez will be teaching the essence of Shamanic healing from his years of experience working with shamans throughout South America. The student will learn specific techniques of Shamanic spiritual healing using hands-on training, spiritual chants, and heart-centered energy healing. Dr. Gonzales will also teach the spirit and applications of Amazonian Botanical Medicines for various degenerative diseases.

Presenter: Jorge Gonzalez Ramirez, Ph.D.

Dr. Jorge Gonzalez-Ramirez is former Rector of the University of San Martín in Tarapoto, Peru and has his doctorate degree in Pedagogy. He has over 30 years of experience in shamanism (curanderismo) using a combination of natural herbs, plants and ancient ceremonies in his healing practice. He has studied with many of the tribes of Peru, Bolivia, Ecuador, Colombia and Brazil such as the Witotos, Cocamas, Jivaros, Aqua Runas, Shipibos and Aguarunas. Currently, Dr. Gonzalez is President of the Peruvian Amazonian School of Shamanism, an affiliate of the University of San Martín. He is also head of the International Institute of Sociological and Traditional Amazonian

Medicine and creator and director of Soncco Wasi (House of the Heart) – both in Tarpoto, Peru.

Cost: \$60 students and faculty / \$75 others

Location: TBA

Time: full day

Credits: .5

CEUs: 6

June 23

Biological Terrain Assessment

The goal of this intensive training practicum is to provide you with an understanding of Biological Terrain and how to use the results of Biological Terrain Assessment (BTA) in obtaining a comprehensive understanding of the body's biochemistry. You will learn how diet and lifestyle can influence and be used to correct Biological Terrain, as well as how to monitor the internal biochemical environment of the body using the BTA. Previous experience with the BTA is not necessary; testing procedures will not be covered in this practicum.

Presenter: Chad Oler, ND

Dr. Chad Oler has an extensive background in natural health and healing, with over 15 years experience researching and consulting on nutrition and exercise. He has studied, lectured and taught throughout the United States, Canada, Great Britain, Germany, Peru, and Southern Africa. He holds degrees or certificates in Chemical Engineering, Technical Communications, Business, Shamanic Medicine, Personal Training, Reiki and Sports Nutrition in addition to his doctorate in Naturopathy. Dr. Oler is an avid athlete who enjoys triathlon and hockey. He is co-founder of the Natural Path Center, a holistic clinic in Madison, WI.

Cost: \$75 students and faculty / \$100 others

Location: TBA

Time: 9-12, 2-5 PM

Credits: .5

CEUs: 6

June 24

Computer Regulation Thermography (CRT)

Computer regulation thermography is not just an alternative to mammograms. It is a functional diagnostic like an EKG. An EKG tells you how well the heart is functioning and a CRT tells you how well the body and several of its organs are functioning. This means you become aware of developing disease before it becomes untreatable.

Presenter: Carla Garcia, CRT Practitioner

Carla Garcia is a computer regulation thermography specialist. She has studied biological medicine with DR. Thomas Rau since 1998. Her expertise in thermographic analysis comes from extensive training and work with doctors in Germany and the U.S.

Cost: donation, but register to reserve a seat
Location: TBA
Time: 7-9 PM
CEUs: 2

June 25
The Science of Colostrum

This lecture will focus on the properties of colostrum as a natural food source supporting all immune functions of the body. Topics will include colostrum processes and component valuing based on Dr. Richard Cockrum's 40 years of research, and his new research just out of Cornell university on the immunomodulators in colostrum. Studies conducted at Cornell University and Immuno-Dynamics, Inc. have shown that supplementation of the diet of experimental animals with a dried preparation of first milking bovine colostrum was associated with a statistically significant modification of several markers in the blood associated with functioning of the immune response to bacterial infection. Heightened activation of the host immune response was associated with lower bacterial counts and less inflammation in treated animals. The findings from this study provide for the first time substantial scientific evidence for what has been postulated for many years – that daily human intake of a truly effective first milking bovine colostrum will bolster the ability of the immune system to respond to microbial infections.

Presenter: Richard Cockrum, DVM

Dr. Richard Cockrum's interest in white blood cells and the body's lymphatic drainage system began in the early 1950's. He studied pre-med and law at Washburn University in Kansas before receiving his degree in veterinary medicine from Iowa State University in 1963. Upon graduating he opened a veterinary practice in central Iowa where he established one of the first preventative medicine practices in the United States. Fueled by this interest in preventative medicine, and coupled with his awareness and experience with the immune system function, Dr. Cockrum proceeded to develop a pure colostrum process for production, thereby founding the Science of Colostrum. He founded Immuno-Dynamics, Inc. in 1980 and began identifying, qualifying, and quantifying colostrum components. Dr. Cockrum is a partner with the *Feather Wind Unlimited*TM company of Santa Fe whose founder and president is Anne Firth, RN. Ms. Firth is a deeply committed Health Consultant who, along with Dr. Cockrum, spends hours each day educating people about the benefits of colostrum as a support to the immune system.

Cost: donation, but register to reserve a seat
Location: TBA
Time: 7-9 PM
CEUs: 2

June 26

The Peril of Vaccinations

This lecture will focus specifically on the dangers in vaccinations for your children, long-term side effects and alternatives available today. It will also address legal issues, foreign travel, and politics involved in the mandatory requirements for vaccinations and immunizations along with options and alternatives that parents and practitioners may choose.

Presenter: Angelika Koch, MCH, RSHom, HNHlr, MGNI, IAC

Dr. Angelika Koch sees herself as a practitioner of “Integrated Medicine”. She trained in England as a Registered Homeopath, Herbalist & Natural Healer, Iridologist and Colourtherapist. In England, next to running a full-time private practice, she also taught seminars at several schools in basic anatomy, herbalism, Earth Medicine and Native American medicinal plants. Born in Germany, and a mother of two sons, Dr. Koch spent years in India and England. She now lives in Taos, New Mexico where she founded “Terra Nova”, a center for integrated and educational medicine.

Cost: donation, but register to reserve a seat

Location: TBA

Time: 7-9 PM

CEUs: 2

June 27

Nutritional Therapies for Cancer Prevention & Treatment

Knowledge is power, especially when you or someone you know is told, “It is cancer.” This dynamic workshop will address both Prevention (reducing your risk) and Natural Treatment Modalities. Topics to be covered include:

- ☐ The Biochemistry of Cancer
- ☐ Cancer Marker Tests for Detection
- ☐ Positron Emission Tomography for Detection
- ☐ 30 Plus Factors that Contribute to Cancer – with emphasis on pesticides, chronic stress, DNA damage, toxic emotions, viruses, biological/cellular terrain, detoxification pathways, and immunosuppression
- ☐ Malnutrition and Malabsorption in the Cancer Patient
- ☐ Are Nutritional Supplements Beneficial? If so, Which Ones?
- ☐ Can & Should Antioxidants be used during Chemotherapy & Radiation?
- ☐ Reducing Your Risk
- ☐ What is the Best Diet for Cancer Prevention?
- ☐ Selecting Cancer-Specific Phytonutrients with Proven Track Records
- ☐ Nutritional Protocols for Cancer Patients

Presenter: Larry Milam, PhD, D.I.Hom., HMD

For the past 20 years Dr. Larry Milam has traveled throughout the world spreading his passionate message: “You can take charge of your health if you have the right knowledge.” Dr. Milam holds two doctorate degrees – a Ph.D. in Clinical Nutrition from the University of Natural Medicine and a Doctor of Homeopathic Medicine from

the British Institute of Homeopathy in London. He is the lead research chemist at his research and development laboratory located in San Dimas, California where he works constantly on developing cutting edge nutritional supplements, superfoods, and anti-aging modalities and technologies. Dr. Milam is a frequent guest lecturer at medical conferences, health seminars, and expos; has appeared on numerous radio and TV shows in the U.S. and Europe; and is the author of three books. He was recently elected president of the University of Natural Medicine where he has served as Professor of Nutrition for the last two years. He is also a charter member and medical advisor to the Society of Natural Medicine in Moscow, Russia.
